

German Manufacturer Showcases High-performance Lubricants at Pharmapack 2025

For the first time, Chemie-Technik, the German manufacturer behind the globally recognised ELKALUB brand of high-performance lubricants, is participating in Pharmapack 2025. The company will present its specialised lubricants tailored to the stringent demands of the pharmaceutical industry. The production and packaging of pharmaceutical goods require adherence to strict regulatory standards to ensure safety, precision, and efficiency.

ELKALUB meets these requirements with a comprehensive range of NSF H1-registered lubricants, including greases, oils and sprays. These products are designed to ensure smooth machine operations while mitigating risks such as contamination and production downtime.

A Customised Approach for Pharmaceutical Manufacturers

Chemie-Technik emphasises customisation, offering bespoke lubricant solutions to address the unique needs of pharmaceutical production lines. Whether simplifying complex lubrication processes or navigating evolving regulatory landscapes, ELKALUB supports its clients every step of the way.

“Changing global regulations, such as the shift toward PFAS-free lubricants, can create challenges,” explains Technical Sales expert Christian Hof of the company’s founding family. “We proactively monitor these changes and recommend compliant, efficient alternatives, ensuring our customers remain ahead of compliance requirements.”

Trusted by Industry Leaders

Leading equipment manufacturers trust ELKALUB products for the initial lubrication of their machines. The company’s research and development team collaborate closely with clients to create tailor-made solutions that enhance machine reliability and efficiency. Backed by a global distribution network, Chemie-Technik guarantees consistent, high-quality supplies, regardless of geographical location.

Benefits of ELKALUB Lubricants

Pharmaceutical manufacturers can expect the following benefits when using ELKALUB products:

- **Maximum Safety:** NSF H1 registration ensures compliance with strict safety standards.
- **Integrated Lubrication Concepts:** Comprehensive solutions for all production needs.
- **Reduced Downtime:** Enhanced machine performance and reliability.
- **Global Support:** A robust sales and service network ensures worldwide availability and local regulatory compliance.

Excellence Rooted in Tradition

Established in 1956, Chemie-Technik remains a family-owned enterprise managed by the second generation of its founding family. With a team of 35 experts based at its headquarters in Vöhringen/Württemberg, the company handles development, production, and in-house sales. A global network of representatives, including independent distributors, provides operational sales and on-site customer support.

The company is dedicated to continuous improvement, maintaining ISO 9001 certification for quality management since 1997, and ISO 14001 certification for environmental performance since 2008. Chemie-Technik supplies its high-performance lubricants to leading companies across

multiple industries, including printing, food, pharmaceuticals, automotive, and tool manufacturing.

A History of Innovation

Chemie-Technik has a long-standing reputation for innovation, introducing the first H1-registered lubricant to the market in 1995. Today, its expertise in the printing, packaging, and food processing industries seamlessly translates to the pharmaceutical sector, making ELKALUB a trusted name for companies operating packaging and filling lines.

Visit Chemie-Technik at Pharmapack 2025

At Pharmapack 2025, Chemie-Technik aims to connect with contract manufacturing organisations (CMOs), original equipment manufacturers (OEMs), automation specialists, and other key players in the pharmaceutical packaging and filling industry.
